

PRODUCT DATA SHEET

Product: MeOSuc-Ala-Ala-Phep(Oph)₂ (DAP Inhibitor)

Cat. No: AB-046 (5 mg)

(X = Amino-blocking group; H; Detection Probe)

Limitations:

For research use only. Not for use in diagnostics or in humans.

Warranty:

No warranties, expressed or implied, are made regarding the use of this product. KAMIYA BIOMEDICAL COMPANY is not liable for any damage, personal injury, or economic loss caused by this product.

Description:

MeOSuc-Ala-Phep(Oph)₂ is a Peptidyl Amino-alkanephosphonate Inhibitor (DAP). The DAP inhibitors, which can be used as an alternative to the Chloromethyl Ketone derivatives (CMK), are serine specific and non-thio reactive.

Features of Peptidyl Amino-alkanephosphonate (DAP):

- non-alkalating
- stable in aqueous solution
- minimal toxicity
- serine specific
- cell permeable

Formula:

C₃₀H₃₆N₃O₈P

Molecular Weight: 609

Solubility:

Soluble in DMSO

Format:

Semi-solid/gum

Analytical Data:

Mass Spec: M+1=610.2, M+Na=632.1
Chromatography: 5% MeOH/EtOAc, Rf: 0.45

Storage and Stability:

Stable for >1 year when kept desiccated at room temperature.
