

## PRODUCT DATA SHEET

**Product:** **Herbimycin A**

**Cat. No.:** KT-375 (1 mg)

**Formula:**

$C_{30}H_{42}N_2O_9$

**Molecular Weight:**

574

**Description:**

Herbimycin A is a microbial metabolite that was first identified as a herbicidal compound and has also been found to have anti-Tobacco Mosaic Virus (TMV) and anti-tumor activity. Herbimycin A is the first antibiotic which inhibits src oncogene function. Herbimycin A shows morphology-normalizing activity in tumor cells, and also has anti-angiogenesis activity.

**Format:**

Herbimycin A is supplied in lyophilized form.

**Production:**

Isolated from cultures of *Streptomyces hygroscopicus* strain AM-3672.

**Purity:**

>90% by HPLC

**Solubility:**

Dissolve in 1 mL DMSO. Dilute just prior to use in methanol or ethanol.

**Storage:**

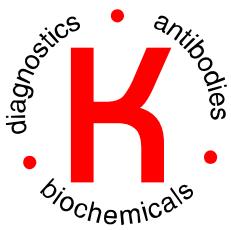

Store DMSO stock solution at 4°C. Store lyophilized form at -20°C long term.

### **Limitations:**

For *in vitro* research use only. Not for use in diagnostics or in humans.

### **Warranty:**

No warranties, expressed or implied, are made regarding the use of this product. **KAMIYA BIOMEDICAL COMPANY** is not liable for any damage, personal injury, or economic loss caused by this product.
